

IRONSCALES

World's 1st Automated Phishing
Prevention, Detection & Response Platform

AI Powered Rapid Phishing Response

**WITH 82 SECONDS ON AVERAGE UNTIL THE FIRST CLICK IS LURED,
HOW QUICKLY CAN YOUR ORGANIZATION RESPOND?**

IRONSCALES drastically reduces risk on your employees as well as workload burden on security teams by expediting the time from mailbox detection to response, using a unique combination of human and machine intelligence.

Critical Factors In Addressing Phishing

Simple Deployment

Deploy in two-clicks with Office 365/Exchange and G Suite. Complement and strengthen existing technologies already in place.

Automated Investigation & Response

Streamline and automate incident analysis and response from employee phishing reports, reducing the time phishing emails lie idle in mailboxes. We allow your security team to focus on what's important.

A Virtual Globalized SOC

Benefit from anonymous peer2peer actionable intelligence from other certified analysts within the IRONSCALES global community. Get real-time visibility into incidents that other analysts are dealing with.

Empowered Employees

With proprietary inbox augmentation technology, employees can make better security related decisions, becoming better reporters and part of the solution against advanced phishing threats that bypass gateway defenses.

A Single, Comprehensive and Integrated Platform

THREAT ASSESSMENT

- Attack Simulation and Awareness Training

ADVANCED THREAT PROTECTION

- Advanced Malware and URL/Link Protection
- Advanced Protection Against Business Email Compromise (BEC)

SECOPS

- Automated Email Phishing Investigation,Orchestration & Response
- Automated & Collaborative Phishing Campaign Detection
